WLA Covid-19 Prevention and Response Plan

Preventative Measures

This pandemic is bigger than any one of us, which is why we need to unify around safe practices. Every person that commits to practicing safe choices contributes to keeping our communities healthy and strong. Here are SPUT's commitments to preventative measures:

Weekly Updates

- Updates on Covid-19 situation in Ramsey County and Minnesota will be provided each Thursday. Staff will provide recommendations on who should consider staying home at that time.

Before/After the Lesson

- Weekly symptom check for all staff and participants
- Temperature check before entry
- Spacing and sanitation measures on court
- Quarantine required for all staff and participants potentially infected
- Masks and equipment available upon request

During the Lesson

- Players maintain distance of 10 feet
- Sanitize hands before and after ball pick-up
- Coaches required to wear masks on same side of net as students
- Players wear masks to and from court. Masks may come off during play but need to be put on any time they are within 10 feet of others.

Response Action Plan

Each person must assess their own risk factors. While tennis is among the safest sports to play, there is no 100% risk free guarantee. We are confident in our preventative measures but have strategies in place to respond in the event of a potential participant or staff infection.

If a household member or recent contact contracts Covid-19:

1. Notify a SPUT staff member immediately as soon as you are aware
2. Any staff or participants from that household will be removed from programming until a negative test is confirmed and 10-day quarantine period is observed.
3. Participants and staff of that group will be notified and kept aware of the situation (no personal information will be shared)
4. Lessons continue
5. An internal review will commence to ensure proper safety measures are in place

If a participant or staff member contracts Covid-19:

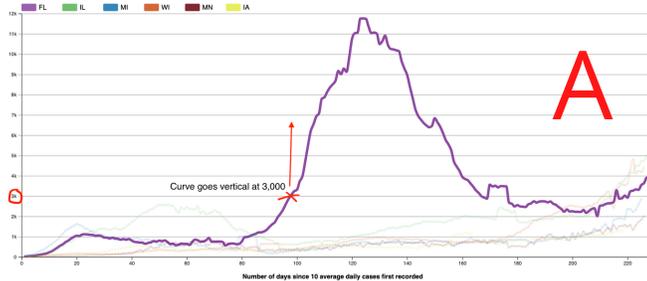

1. Notify a SPUT staff member immediately as soon as you are aware
2. The affected person will be immediately removed from lessons. A negative test result and 10-day quarantine period are required for return to lessons.
3. Participants and staff of that group will be notified and kept aware of the situation (no personal information will be shared).
4. Participants and staff who shared a court with the infected player will observe a 14-day quarantine period before returning to lessons.
5. An internal review will commence to ensure proper safety measures are in place

Precautionary Awareness

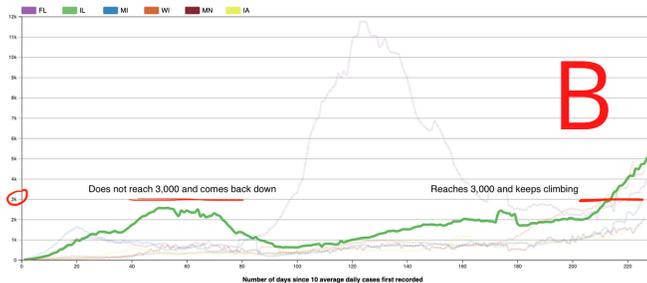

SPUT will provide weekly updates on Thursdays. At that time, we will announce the daily average for the week and provide our decision on programming. Below is the table we will use to advise our decisions.

Daily Case Average	Below 1,000	1,000 - 3,000	3,000 - 6,000	Above 6,000
Likely Action	Programming goes ahead as normal. Masks may be taken off while on court.	Programming goes ahead as normal. Masks must be worn at all times.	Warriors with vulnerable family members asked to stay home.	Programming postponed until average drops.

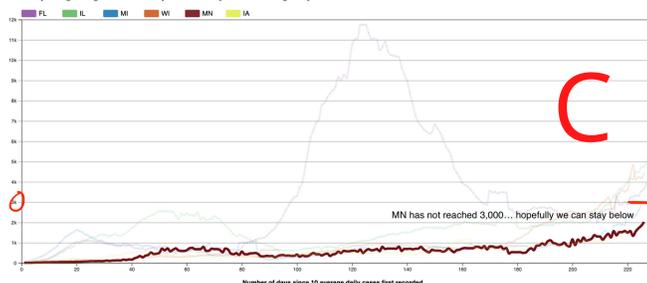

New cases of Covid-19, reported to CDC, in FL, IL, MI, WI, MN, and IA
Seven-day rolling average of new cases, by number of days since 10 average daily cases first recorded.

New cases of Covid-19, reported to CDC, in FL, IL, MI, WI, MN, and IA
Seven-day rolling average of new cases, by number of days since 10 average daily cases first recorded.

New cases of Covid-19, reported to CDC, in FL, IL, MI, WI, MN, and IA
Seven-day rolling average of new cases, by number of days since 10 average daily cases first recorded.

Watching the Curve

The graphs to the left show the average daily covid cases for different states. SPUT used these graphs to determine our covid thresholds.

A) Florida: In this graph, you see that once Florida hit 3,000 daily cases they were unable to bring their curve back down.

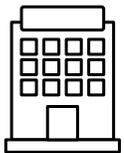

B) Illinois: Early on, Illinois got as high as 2,800 daily cases but was able to bring it back down. Now they have reached 4,000 and are unable to bring it back down. However, the curve is much flatter than Florida's was.

C) Minnesota: Minnesota has been able to keep their curve flat by investing in testing capabilities and policies. In early November, cases reached 5,000 for the first time. However, the state is well positioned to manage cases if we all stay responsible.

Arrive Safe • Stay Safe • Leave Safe

Arrival and Dismissal Process

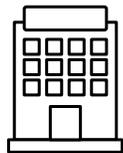

1) Preparation

2) Eastview

3) Bus

4) White Bear

5) Symptom
Check
Station

6) Sanitizing
Station

7) Wait
Area

8) On
Court

9) Clean
Up

10) Sanitizing
Station

11) Wait
Area

12) Bus

13) Eastview

14) Home

1) Preparation

- Complete symptoms check day before program.

2) Eastview

- Staff checks temperature
- Sanitize hands
- Wait outside (dress warm!)
- If too cold, wait in gym spaced out 10'

3) Bus to White Bear

- Warriors sit every other seat

4) Arrival at White Bear

- Stay 6' apart as we enter

5) Symptom Check Station

- Temperature check required
- Sign in

6) Sanitizing Station

- Sanitize hands before going to courts

7) Wait Area

- While waiting for courts to become available, Warriors will maintain spacing of 6' in the hallway

8) On Court

- Wait for coach instructions to take off mask
- Maintain 10' between others

9) Clean Up

- Sanitize any shared equipment

10) Sanitizing Station

- Sanitize hands

11) Wait Area

- 6' Apart while waiting to board bus

12) Bus to Eastview

- Warriors sit every other seat

13) Eastview

- Make sure your ride is ready for you 5 minutes before return
- If ride is present, go straight to your car.
- If ride is late, wait outside 6' from other warriors. (if it is too cold, spacing will be set up inside)

14) Home

- Please keep track of your symptoms at home and notify a SPUT staff member IMMEDIATELY if you suspect there is a possibility of Covid-19 contraction.

Frequently Asked Questions

What should I do if I start noticing symptoms in myself or my family?

Please stay home! Seek out a test as soon as possible. If you are unable to get tested, we ask that you observe a 7 day quarantine period before returning to programming.

Do participants have to wear masks the entire time?

Participants are required to wear a mask any time they are NOT on court. This means that a mask is required in all public spaces. Once the warrior steps onto their designated court, they are required to wait for coach direction to take their mask off. If warriors have health related concerns for themselves or a family member, please notify a staff member. We may be able to establish a court where a mask is required at all times to further reduce the risk of exposure.

What precautions is Lifetime White Bear taking to prevent Covid-19 spread?

At the beginning of the pandemic, Lifetime upgraded all their facilities to the highest grade ventilation and filtration systems on the market. They are incredibly effective in filtering out Covid-19 particles. Additionally, outside air is pushed through the facility on a regular basis. ***Playing tennis at White Bear is of similar risk to playing tennis outdoors.*** Additionally, masks are required throughout the facility and temperature checks are conducted before guests are allowed to enter.
